OPERATING INSTRUCTIONS:

1. Pump must turn counter-clockwise when looking down from top.
2. Fasten pump solid so it will not move when operating.
3. Make sure all moving parts are shielded.
4. Keep children and livestock away from pump.
5. Have an Electrician check amp draw when operating to make sure the motor has enough electricity.
6. Check bottom bearing for wear occasionally.
7. Keep belts snug but not overly tight.
8. **EXTREME DANGER** – Never enter a dirty manure spreader or storage tank – one breath of hydrogen sulphide gas is enough to kill. Have a ladder in your pit, so that if by accident you should fall in, you can get out.
